

MARK3[®]
THE SMART ALTERNATIVE

Vinyl Polysiloxane Alginate Alternative

FEATURES & BENEFITS

MARK3 Alginate Alternative is an extremely versatile Vinyl Polysiloxane impression material that serves as a substitute to traditional alginate. MARK3 Alginate Alternative eliminates the need for hand mixing, saving procedure time and cleanup, while providing precise and accurate impressions. Due to the superior dimensional stability and high distortion resistance, impressions can be poured multiple times with consistent accuracy.

Used for dental impressions, orthodontic models, removable retainers & splints, nightguards, bleaching trays, occlusal appliances, dentures, and taking a matrix impression for provisional fabrication.

- Pre-mixed cartridges
 - No mess
 - Saves time
- Excellent dimensional stability decreases distortions
- Pleasant mint flavor
- Cost effective alternative
